EXECUTIVE SUMMARY

The Growth tier is underpriced against its feature set, and API access is given away below the level where large accounts would pay for it. Moving API access to Enterprise and raising Growth to \$89 is the highest impact change available, with an expected 14% MRR gain at medium risk.

REVENUE SCENARIO ANALYSIS

SCENARIO	PROJECTED MRR	USER LOSS	NET CHANGE
Current baseline	\$10,830.00	–	–
+10% price increase	\$11,555.61	3.0%	+6.7%
+20% price increase Recommended	\$11,956.37	8.0%	+10.4%
+30% price increase	\$11,544.84	18.0%	+6.6%

A +20% increase yields the highest projected MRR with an estimated 8% user loss. At +30% the additional churn cancels the gain.

REVENUE BY TIER AT +20%

TIER	SUBSCRIBERS	CURRENT MRR	PROJECTED MRR
Starter	100	\$2,900.00	\$3,201.60
Growth	50	\$3,950.00	\$4,360.80
Enterprise	20	\$3,980.00	\$4,393.92

FEATURE PLACEMENT AUDIT

FEATURE	CURRENT TIER	CLASSIFICATION	RECOMMENDED ACTION
API access	Growth	Gatekeeper	Move to Enterprise
Data export	Enterprise	Blocker	Move to Growth
SSO login	Enterprise	Right placed	Keep
Priority support	Growth	Right placed	Keep
Audit logs	Enterprise	Right placed	Keep
Email support	Starter	Undifferentiated	Rethink positioning
Basic analytics	Starter	Undifferentiated	Rethink positioning

Biggest issue. API access is included in Growth but is a power-user feature that larger accounts would pay more for.
